Problem20: Calculate Sum and Mean of 10 values.

Code:

```c
#include <stdio.h>

int main() {
    int i, num;
    int sum = 0;
    float mean;

    printf("Enter 10 numbers:\n");
    for(i = 1; i <= 10; i++) {
        scanf("%d", &num);
        sum += num;
    }

    mean = sum / 10.0;

    printf("Sum = %d\n", sum);
    printf("Mean = %.2f\n", mean);
```

```
    return 0;
}
```

Output:

1 2 3 4 5 6 7 8 9 10
Sum=55
Mean=5.50
